---

Susan,

Here are the Gulfco results; as we discussed, lets review these to determine whether an eco removal is necessary. The results are contained in a total of 8 emails, the rest of which will follow.

Thanks,

Gary Miller, P.E.

---

Hi Gary –

Please find attached the 60-day deliverable for the Gulfco BERA. Per our previous discussions, this deliverable contains the following summaries: field activities; toxicity testing; chemical analysis; and data validation. As you know, the complete set of data obtained during the BERA will be provided in the Preliminary Site Characterization Report (PSCR), a draft of which will be submitted within 30 days (i.e., by November 3, 2010). A detailed discussion and evaluation of these data, including the BERA conclusions, will be provided in the BERA report, which will be submitted to EPA within 60 days of EPA approval of the Final PSCR.

Due to the file size of some of the deliverable appendices, I am sending this to you in a series of e-mails. The attachments to this first e-mail are the deliverable text, tables, and Appendix C. Appendices A and B will be provided in separate e-mails. We will also send you a CD via Fed Ex with the complete deliverable.

9543061

Please let me know if you have any questions or comments regarding this deliverable.

Thanks.
